Comments from All Reviewers

Please provide ratings and comments on the following project criteria (1 = low and 5 = high):

1 2 3 4 5 **Overall project quality 5**

Comments: Overall the project is well designed, The functionality is well thought out. The pages are organized well. Navigation is easy. The color contrast was good. It rendered reasonably well when I changed the screen size.

1 2 3 4 5 **Level of creativity and originality demonstrated in the project 5**

Comments: The organization of content within the pages is creative and well thought out. The hovering effect works really well.

1 2 3 4 5 **Project contains an appropriate amount of information to meet its objectives. 4**

Comments: Information is organized in different pages using correct UI components. I would recommend using more visual information to accompany the text information.

1 2 3 4 5 **Quality of elements making up project (HTML/CSS, photos, vector graphics, video, audio, animation, web objects/elements) 4**

Comments: Use of correct HTML components to capture the information. As mentioned before, I recommend utilizing more visual elements with the text elements. Also, at some places, the pages have a lot of empty space. I recommend utilizing the space optimally. That may help reduce vertical scrolling. Though I like the color contrast on the website, I suggest using color other than red for frequently asked questions.

1 2 3 4 5 **Project design (color, fonts, typography, layout/composition). The overall concept/theme/unified look of the website is effective. 5**

Comments: The look and feel is consistent across different pages of the website. The website renders well when I try to change window size to try different layouts. I appreciate the help provided to the user when filling out a form using placeholder text. The font choices are good. On the gift page, image size can be more consistent. On home page, space can be reduced for *what golfers have to say* section.

Do you feel this project is appropriate to include in the student's portfolio considering skill-level demonstrated?

Comments: Yes. A well designed and implemented website.

Did you experience any technical difficulties as you navigated through the website or displayed the project?

Comments: None

What are the main strengths of the project?

Comments: Consistent look and feel. Good design choice with colors and layouts. Organization of information across pages and sections. Easy navigation. The website is responsive to different screen sizes.

What are the main things that could be improved with the project?

Comments: Suggestions for improvements are provided within comments above to some questions. Most improvements suggested are minor ones.
